

Muslim Habit — Full Specification Document (MVP & Architecture)

Platform: React Native (Expo). Languages: Arabic (RTL), English, French.

Purpose: Help users build Islamic habits, reduce sins, grow gratitude, track prayers, and gamify progress with a mosque-builder visual.

1) Product (MVP)

- Daily Challenges (3/day ordered by difficulty).
- Habit Manager (create/edit/delete, schedule, reminders).
- Sin Blocker (track fails, reset streaks, dhikr suggestions).
- Gratitude Tree (grow after every 3 entries).
- Salat Tracker (5-prayer ring).
- Mosque Builder (XP -> visual parts; multiple styles).
- Stats & Progress (daily/weekly).

2) Architecture & Storage

- Frontend: Expo + RN + TypeScript strict.
- State: Zustand. Animations: Reanimated + Lottie.
- Local storage: expo-sqlite with repository adapters; optional Supabase sync.

3) Security & Privacy

- Journals encrypted client-side (PBKDF2 + AES-GCM).
- TLS mandatory. JWT in SecureStore/MMKV.
- Minimal PII; RLS on Supabase.

4) Next steps

- Tooling, Local DB, Stores, UI components, Optimistic flows, Sync, Tests, i18n, Polish.
